

AI Prompt Progression:

Initial Student Prompt: What is HTML?

Refinement 1: Create a simple HTML page that says 'Hello World'

Copy HTML Code

Open notepad

Paste HTML Code

Save as HelloWorld.html

(Notepad saves in txt, change it to save as html in the options menu)

Refinement 2: Create an HTML page with the title 'My First Webpage' that says 'Hello, my name is [Student Name]' and explains what HTML stands for

Final Prompt: (Varied by Student) Add more details.

Student Activities:

1. Use AI to create an html file that says Hello World.
2. Use AI to change the code and add content.
3. Modify the content in the notepad.
4. Save and submit completed HTML file for grading.

Key Learning Points:

- HTML structure (DOCTYPE, html, head, body)
- Basic tags (h1, p, title)
- Proper indentation and commenting
- How specificity improves AI responses
